

The MailFinisher 4000 system is a small to medium volume In Line System which is interfaced with a compatible laser printer, whereby the printer feeds the MF4000 directly and the forms are printed, folded and sealed in one single operation, therefore, speeding up the processing and also making it easier for the operator.

The MF4000N is provided with a static base and a 200 forms integral output catch tray. The system requires a full desktop space to locate the machine and laser printer. Optional cabinets are available which will provide a suitable surface for the whole system and also storage beneath.

Please note the following: The laser printer is not unique to this machine; it can still be used as a normal office laser, either by separating the laser printer from the MF4000 or by using the optional 'Print Only Mode'.

MailFinisher 4000N

Access all areas

The processing speed of the system is regulated by the page per minute speed of the printer. Laser Printer sold separately.

Kyocera FS4000DTN is a compatible laser printer that provides duplex in-line and therefore ALL fold types are available.

Printer compatibility -The system is compatible with the following printers which provide up to 500* sheet in-feed capacity (based on 80gsm paper).

HP LJ4200N

HP LJ4250N
