

The MailFinisher 9500 is the ultimate solution for in-line processing of pressure seal documents whether processing 500 or 200,000 forms per month.

Utilising our proven in-line processing technology and the NEW HP4515X High-Speed laser printer, you are assured of a quick, easy and reliable solution.

The MF9500 is fitted with a Double Document Detection and Bypass System, making light work of any double fed documents that may occur. It also has Four Roller Sealing for excellent seal quality and an Auto Extending Output Conveyor for easy trouble free unloading of your finished documents.

MailFinisher 9500

Locking Security Covers are also included for complete peace of mind when processing secure applications. 14" forms processing is available when fitted with the optional 14" Fold Drum.

The NEW HP4515X's DUPLEX unit enables the 9500 to print and fold all common fold types such as Z, V and C-fold, whether printing on one side or both, providing personalisation to both sides of your documents where required. The MF9500 system has three functional modes; Normal Print-Fold Seal, Print Only (No Folding / Sealing) Feed Only (Feeding of Pre Printed docs)

So if you're looking for ease of use, quick processing, minimal operator intervention and great reliability, then look no further, the MailFinisher 9500 has it all!
