

The MailFinisher 9500AFS (Angle Feed System) is the ultimate solution for in-line processing of pressure seal documents whether processing 500 or 200,000 forms per month. Utilising our proven in-line processing technology, when interfaced with a Hi-Speed Multifunction Copiers or Hi-Speed Printers with a page per minute speed of up to 120 pages you are assured of a Super Fast, Easy and Reliable solution.

The 9500AFS is fitted with a Double Document Detection and Bypass System, making light work of any double fed documents that may occur. It also has Four Roller Sealing for excellent seal quality and an Auto Extending Output Conveyor for easy trouble free unloading of your finished documents.

MailFinisher 9500 AFS

**The Ultimate Hi-Speed,
Hi-Tech In-Line Pressure Sealer**

A height adjustable table is also included to interface with many high speed multifunction copier/printers. When using a Duplex capable print system, the 9500AFS will fold all common fold types such as Z, V and C-fold, providing personalisation to both side of your documents where required.

The MF9500AFS system has 3 functional modes; 1 Normal Print-Fold Seal 2 Print Only (No Folding or Sealing) 3 Feed Only (Feeding of Pre Printed documents)

14" forms processing is available when fitted with the optional 14" Fold Drum. So if you're looking for a low cost per copy solution with minimal operator intervention and great reliability, then look no further, the MailFinisher 9500AFS has it all.
