

The PS100, synonymous with quality and efficiency is repeatedly our customers' preferred choice for small to medium processing of one-piece mailers.

Whether you're processing payslips, pension forms, direct mail, remittance advice slips or any other confidential form, the PS 100 will save you time and money. By folding and sealing your forms at up to 5,000 per hour, the PS100 will leave you with time to concentrate on other tasks.

At the same time, in addition to being tamper-evident, this single piece mailer will save you the cost of envelopes and form insertions.

Fitting easily into any office environment. The PS 100 will work with your existing printer and it's extremely easy to use. With the Pressure Seal process there's no liquid glue, heat or water, therefore no mess or risk of burns.

Paper flow is electronically monitored and the system will automatically shut down in the event of any interruption; you can immediately begin operations without disrupting document sequence or count. In addition, an outfeed counter is a standard feature to allow easy calculation of processed documents.

A full technical specification appears overleaf but of course, the best way to appreciate how the PS100 will work for your business is to see it in action. Call us for a demonstration – we're sure you'll be impressed with what you see.
